## BIOTRONIK Product and Medicare C-Code Cross Reference

## SUMMARY/OVERVIEW:

- The Centers for Medicare and Medicaid Services (CMS) requires providers to report appropriate Healthcare Common Procedure Coding System (HCPCS) Level II codes (C Codes) for all procedures considered "device-dependent."
- C-Codes are required by CMS for the purpose of collecting accurate charge data for current procedures, and for setting future payment rates.
- Hospital bills that include device-related CPT procedure codes without the appropriate accompanying C code(s) describing the device(s) used in the procedure are subject to denial.
- This product cross-reference includes a summary list of BIOTRONIK products. A comprehensive list of C-Codes is available. Click on the link below to view.
