

# BIOTRONIK Patient App

## BIOMONITOR III/IIIIm

### A New App for Patients with a BIOMONITOR III/IIIIm

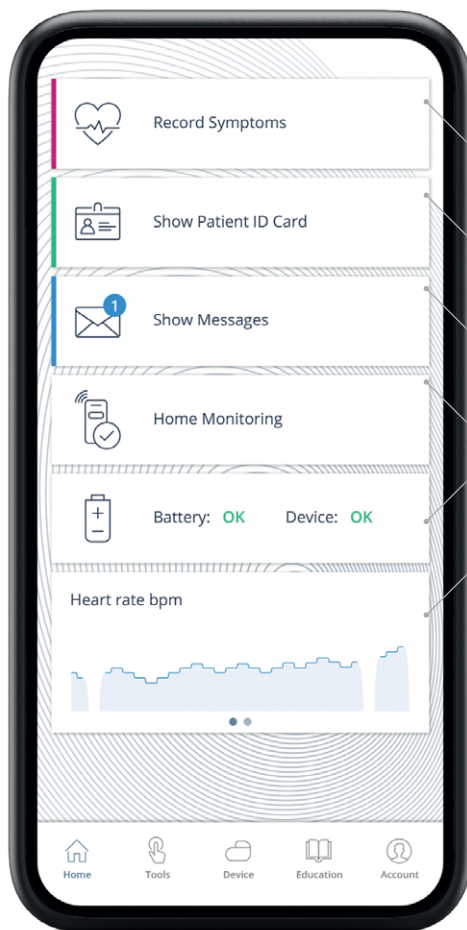

The BIOTRONIK Patient App is a free app for patients with a BIOMONITOR cardiac monitor to better manage their long-term rhythm monitoring.

#### Symptom diary adds relevant information

Symptoms recorded by the patient which are automatically updated to the BIOTRONIK Home Monitoring Service Center contribute to establishing a diagnosis quickly.

#### Help functions save office time

Help functions and a daily update on data transmission help patients establish successful long-term remote monitoring.

### Quick Overview

The patient can easily record their **symptoms**, which are automatically uploaded to the Home Monitoring Service Center.

The digital patient **ID card** displays important information about the cardiac monitor, physician or hospital.

With the **message** function, physicians can send the patient messages to request a call back.

Most up to date **information** on device, battery and Home Monitoring transmission **status**.

Heart rate details.

---

### The BIOTRONIK Patient App is optional.

The Patient App does not replace any hardware such as Remote Assistant or CardioMessenger Smart.

## Designed to Make Long-Term Monitoring More Efficient and Easy

### Establishing a Symptom-Rhythm Correlation

Adding the patient's symptoms to the Home Monitoring Service Center may help you correlate these with the detected arrhythmias.

Symptoms will be shown in the Home Monitoring Service Center with a time stamp.

### You Are in Control

Patient App integration with BIOTRONIK Home Monitoring is activated only with your permission, helping to ensure

### Ensuring Long-Term Monitoring Compliance

Clear feedback for the patient on the data transmission status helps ensure compliance with Home Monitoring. In the rare event data has not been transmitted, there is a
