

BIOTRONIK Patient App

Get Involved!

Record your symptoms

Record any symptoms like dizziness or palpitations as you experience them. When the app is linked to Home Monitoring, this vital information will automatically be transmitted to your physician, which can be very helpful in getting the right diagnosis for you.

Confirm status instantly

Have crucial information about device and battery status at your fingertips. You can also check if your cardiac monitor is successfully transmitting data to your Home Monitoring system, and then to your physician.

Your patient ID info always on you

The Patient App stores all information you could need when you're travelling including specifics of your device, physician and hospital.

Stay in touch

Your physician can easily reach out to you when needed with a "call back request" which you will receive wherever you are.

Keep track of your rhythm

Your average daily heart rate and heart rate at rest is shown to you in detail.

Be informed

Daily lifestyle tips and additional information about your condition or therapy readily available for you.

BIOTRONIK Patient App

Get More Involved in
Monitoring Your Personal
Heart Rhythm

Get Involved!

Do you have a BIOMONITOR III or IIIm and want to be more involved in your heart rhythm management?

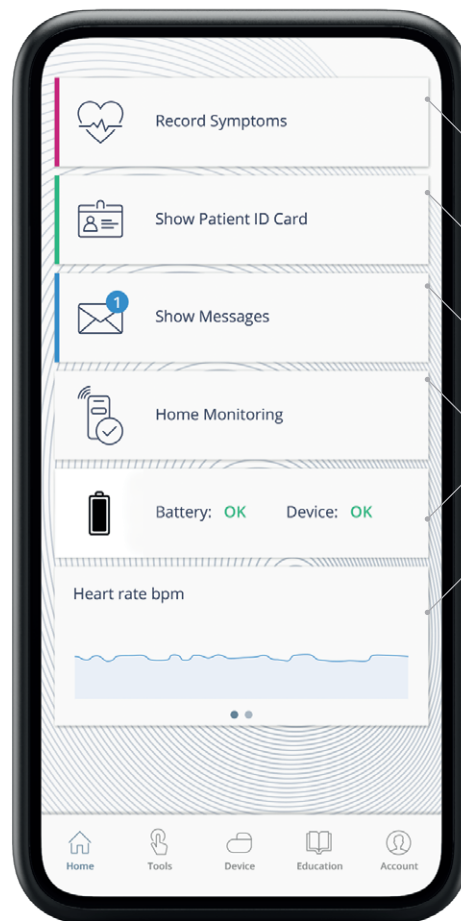

Welcome to the BIOTRONIK Patient App

The BIOTRONIK Patient App is a free app for everyone with a BIOMONITOR cardiac monitor.

Your BIOMONITOR monitors your heart rhythm day and night and transmits the data via BIOTRONIK Home Monitoring fully automatically. But it cannot detect what you feel. Palpitations or dizziness are examples of symptoms which are important to note down as they may help your doctor to make a diagnosis or change your treatment.

In addition to the symptom diary, the BIOTRONIK Patient App has many other useful functions to help you get the most out of your BIOMONITOR.

Quick Overview

Easily record your symptoms as you experience them to help your doctor improve your care or diagnosis.

The Patient ID card displays important information about your cardiac monitor, physician or hospital.

With the message function, your physician can send you messages to request a call back.

Most up to date information on device, battery and Home Monitoring transmission status.

Heart rate details.

Good to Know

"It is good to know my doctor received all the information on my heart rhythm. My Patient App makes me feel better when it shows everything works just fine."

A Perfect Match

By linking the Patient App to the BIOTRONIK Home Monitoring system, you take full advantage of the Patient App functionality. Ask your doctor to grant you such a link.
